

Week 3 Assignment

Overview

For this Assignment, you will be creating a simple CRUD-style application. CRUD stands for Create Read Update Delete, and is a term that is used to describe the core functionality of many web apps. The subject matter for your application is up to you, provided it meets the criteria listed in the Rubric.

Rubric

25 Points	Implements the required AngularJS directives: ng-app, ng-repeat, ng-model, etc.
25 Points	Correctly implements at least 3 different views / routes.
25 Points	User can add and remove items from the list, and these changes persist between refreshes (Local Storage)
10 Points	At least 1 RouteParameter Is Implemented
15 Points	Application is Professionally Styled
